

## Criteria Used:

1. JQuery effects - throughout tabs
  - a. switchClass - used on the journey tab for the city info details when the drop pins are clicked.
  - b. fadeout - journey tab for the default text details box in the top left corner of the content area.
  - c. Toggle – the menu tab on the menu buttons
  - d. anijs – used throughout – the tabs are anijs; animation of the tab content when tabs are clicked. 'Just for fun' button on the menu tab
2. Animated Bar Chart - the distance tab
3. Interactive Image Gallery – the gallery tab
4. HTML5 audio tag – autoplay with on/off button
5. Canvas – 1 used for bar chart

I chose this idea for project because of the holiday season. It seemed like it would be a fun way to play with jQuery and animation. I kept it light and tried to have fun with it. Unfortunately, I got a little distracted by the many awesome plugins and lost a lot of valuable time trying to get them to play nice with each other.
